GOVERNMENT REVIEW.

No. D/1980 OF 1914.

OFFICE OF THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY:

Poona, 9th July 1914.

From

THE HONOURABLE SURGEON-GENERAL
R. W. S. LYONS, M.D., I. M. S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit for the information of Government the Triennial Report of the Civil Hospitals and Dispensaries of the Bombay Presidency for the years 1911—1913.

STATEMENT A.

Hospitals and Dispensaries.

2. The total number of intitutions open on 1st January 1913 was 715. During the year 41 institutions were opened and 14 were closed, leaving 742 institutions at work at the end of the year.

3. The number of institutions shown under classes I to IV, which was 351 at the close of the 3 years 1908—1910 rose to 371 during the three years under review. As a result of the scheme for providing additional dispensaries in districts, 9 dispensaries were opened at Dahiwádi, Ráver, Ladiun, Chachro, Medha, Shirála, Devgad, Devrukh and Ron during the past three years and the establishment of 6 more dispensaries at Paud, Ankola, Akalkuva, Khed, Nargund and Tadkeshwar has been sanctioned.

4. The new Civil Hospital at Jalgaon, which was under construction, was completed and opened on 9th February 1913. The Hospital has been erected entirely by voluntary subscriptions in memory of his late Majesty and is called King Edward VII Memorial Hospital. On the opening of this Hospital the Sunder Mulji Dispensary at Jalgaon was closed. The Hospital contains 45 beds including a ward for Europeans and is furnished with electric lights and fans and is well equipped with modern instruments and appliances.

5. Additions and improvements have been made to various Hospitals during the past three years as follows :—

New observation wards were provided at the St. George's Hospital, Bombay; Nurses' Quarters and a wall round the compound were built at the Gokuldas Tejpal Hospital, Bombay, and the Operation Room at the Ratnágiri Civil Hospital has been provided with marble flooring. At Kárwár a female ward was constructed and a new out-door department opened. Accommodation for insane patients was provided at Dhulia and Godhra Civil Hospitals. Marble flooring and minton tile dados to two wards were provided at the Hyderabad Civil Hospital and a compound wall was built round the Nurses' Quarters. A verandah on south side of main wards was provided at the Aden Civil Hospital. At the J. J. Hospital, Bombay, the Wadia Home for Nurses provided by Bai Jerbai N. Wadia was completed and taken into use. At Ahmedabad the Nowroji Maternity wards

and the General Hospital for Parsis and Europeans provided by Khán Bahádur Nowroji Pestonji Vakil, C.I.E., were completed and brought into use. A separate ward for Parsis has been built at the Broach Civil Hospital by Mr. M. S. Vakharia. In the Panch Maháls District a dispensary has been provided and endowed by Sardár Bomanji Ardeshir Dalal. Mr. G. P. Agarwale has provided a female ward to the Dispensary at Shirpur. Work on the new King Edward VII Memorial Civil Hospital at Sholápur is in progress and the buildings are expected to be ready in 1916.

6. The need for a larger and more modern Civil Hospital at Mahábaleshvar had long been felt, but had to be postponed from year to year because a suitable site could not be obtained. This obstacle has now been removed by the generous gift of the property known as 'The Shrubbery' by Mr. Natottam Morarjee Gokuldas; the foundation stone of the building has been laid and work on the building will commence shortly.

7. In order to increase the hospital accommodation sufficiently to meet pressing needs much still remains to be done. In the mofussil some progress has been made, 20 hospitals and dispensaries having been added during the past 3 years, but suitable accommodation for maternity and gynæcological cases is required in most of the hospitals and also wards for the treatment of advanced cases of tuberculosis for which separate accommodation exists in only a few hospitals. In Bombay City the King Edward VII Memorial Hospital, to be built at Parel, is urgently required for the large mill and general population in the north of the Island. In addition to this hospital an infirmary for chronic incurable cases and one or more tuberculosis hospitals for advanced cases of tubercle are necessary to relieve the general hospitals of the city which are not suitable for the treatment of these cases. In Poona an Infirmary of 50 beds for incurable chronic patients has been opened and has released a number of beds in the Sassoon Hospitals which are used for more urgent cases.

STATEMENT B.

8. The total number of patients treated during the year 1913 was 2,355,620 as compared with 2,356,118 in 1912 and 2,191,531 in 1911. The mean number treated during the triennial period under review was 2,301,089 against 2,238,279 for the preceding triennium, an increase of 62,810. On an average 58,431 patients received treatment annually as in-patients and 2,241,699 as out-patients during the past 3 years as compared with 53,125 and 2,185,154, respectively, treated during 1908—1910.

9. The increase in the number of in-door patients treated in general hospitals has not been confined to any one class but affects men, women and children. But whereas the increase is only 5·77 per cent. for men, for women it is 18·26 per cent. and for children 20·4 per cent. The increasing popularity of general hospitals among women and children has been largely contributed to by the introduction of nursing into many of the hospitals and the time has come when an effort should be made to have at least the maternity and women's wards of all civil hospitals nursed by properly qualified women.

10. The mean daily average attendance of in-door and out-door patients for the triennium was 3,225·1 and 20,108·7, respectively, against 2,843·5 and 19,536·0 for 1908—1910.

11. During the triennial period under review the average number of in-patients who were discharged "cured" was 38,793 as compared with 33,728 in 1908—1910. The average mortality for the period was 5,294 against 5,134 for 1908—1910. The percentage of mortality for the triennium under report was 9·0 against 9·6 for the preceding triennium.

12. There has been a steady rise during the past three years in the number of beds available. At the close of the previous triennium (1908—1910) the number of beds available was 5,888. It rose to 6,160 in 1911, 6,276 in 1912 and 6,518 in 1913. Notwithstanding the increased number of beds the demand for more accommodation continues.

Statements C-I and C-II.

13. The subjoined two tables show the principal diseases among the in-door and out-door patients treated during the triennium and mortality among the in-door patients :—

In-door.

Disease.	1911.		1912.		1913.		Mean for the triennium 1911—1913.	
	Total treated.	Deaths.	Total treated.	Deaths.	Total treated.	Deaths.	Total treated.	Deaths.
Cholera	103	30	735	380	94	39	311	150
Dysentery	1,157	189	1,793	273	1,496	220	1,482	227
Leprosy	1,844	126	1,757	170	1,627	142	1,743	146
Malaria	6,380	167	6,727	164	6,736	156	6,614	162
Small-pox	460	89	810	187	457	89	576	123
Tubercle of the Lung ...	1,049	355	1,035	369	1,108	379	1,064	368
Other tubercular diseases	966	144	1,193	198	1,247	155	1,135	166
Diarrhœa	1,280	330	1,706	472	1,314	351	1,433	384
Injuries (General and Local)	7,739	544	8,064	560	8,692	661	8,165	588

Out-door.

Disease.	1911.	1912.	1913.	Mean for the triennium 1911—1913.
	Total treated.	Total treated.	Total treated.	Total treated.
Cholera	444	4,592	454	1,829
Dysentery	33,802	49,314	36,111	39,742
Leprosy	687	658	693	679
Malaria	3,61,779	3,72,704	4,17,274	3,83,919
Small-pox	284	671	366	440
Tubercle of the Lung ...	4,863	5,279	5,595	5,246
Other tubercular diseases	4,523	4,747	5,024	4,765
Diarrhœa	47,390	59,102	47,060	51,184
Injuries (General and Local)	1,42,221	1,53,897	1,60,977	1,52,365

14. *Cholera* furnished 6,422 cases against 3,244 in 1908—1910. The increase was due to the severe cholera epidemic of 1912 which involved practically the whole of the Deccan and Konkan.

15. The treatment of cholera by 1 grain tablet of permanganate of potash has been favourably reported on by Deputy Sanitary Commissioners who have used it, but the number of cases they were able to treat was small and a definite opinion on the utility of this method cannot be formed until it has been more widely tried.

16. *Dysentery and diarrhœa* gave rise to 281,525 admissions against 257,481 in the preceding triennium. The increase was due to the prevalence of these diseases in 1912. Their causation is being investigated in Poona by Captain Morison, I. M. S., at the instance of the Government of Bombay and in other parts of India by investigators working for the Indian Research Fund. The reports of these investigations have not yet been published.

17. *Leprosy.*—7,266 cases were admitted against 8,031 during the previous 3 years. The investigation of the treatment of leprosy by vaccine is being continued in Bombay. During the 3 years under review Bombay City and the districts of Poona, Belgaum, Dhárwár and Bijápur have been notified under the Leper Act and also certain areas in the Ahmedabad, Sholápur, Ratnágiri and Thána Districts in which Leper Asylums are located.

18. *Malaria.*—There were 1,171,600 admissions for malaria against 1,270,121 during the years 1908—1910. Besides these 107,476 cases were treated by medical officers deputed to travel in malarious tracts. During 1912 and 1913 Rs. 50,000 worth of "quinine treatments" were sold to the public in malarious areas. In Bombay City the abolition of the breeding places of mosquitoes is being carried out and malarial surveys have been made or are being carried out in Sind, Gujarát and Kánara.

19. *Small-pox.*—The total number of in-door and out-door cases of small-pox treated during 1913 was 823. Of these, 360 were unvaccinated, 391 vaccinated in infancy, 17 vaccinated in later life, 6 vaccinated after infection and 1 was re-vaccinated. The vaccinal condition was not known in 48 cases. The total number of cases of small-pox for the 3 years under review was 3,048 against 3,879 in 1908—1910.

20. *Tuberculosis* gave rise to 36,629 admissions against 29,831 in 1908—1910. This large increase is no doubt mainly due to more accurate diagnosis and to the number of cases brought to light by the activity of the King George V Antituberculosis League in Bombay and other large centres. But in addition to these apparent causes of increase, the disease is believed by medical men to be spreading particularly in large towns.

21. Of the total number of admissions 18,929 were due to tubercle of the lung. Regarding these no comparison with previous years can be made as they have only been shown separately since 1910.

22. No tuberculosis hospitals have yet been established in the Presidency and cases of the disease in all its stages are treated in general hospitals. This is most objectionable, but it is hoped that within the next few years tuberculosis dispensaries and wards for the treatment of advanced cases of the disease will be established in most of the large towns.

23. *Injuries local and general* accounted for 481,590 cases against 360,799 in the previous 3 years. The increase is due to the increasing use of mechanical appliances of all kinds in connection with the industrial expansion of the country.

24. *Serum therapy.*—The treatment by sera and vaccines of many forms of disease has continued to extend during the past 3 years so that the grant for this purpose had to be increased from Rs. 1,500 to Rs. 2,000. Salvarsan has also come into more general use, having established its efficacy in the treatment of certain refractory cases of disease.

25. *Dengue fever* appeared in epidemic form in certain parts of Surat, Khándesh and Kaira Districts also in certain parts of Káthiáwár.

Statements D-I and D-II.

26. The attendance at Police, Canal, Forest and other State special institutions rose from 42,813 in 1911 to 45,842 in 1912 and 57,505 in 1913. The

average attendance during the triennium under report was 48,720 as compared with 46,496 in 1908—1910. The increase is partly due to 2 new Canal Dispensaries having been opened during the period under review.

27. The total number of patients treated at Railway Hospitals and Dispensaries during 1913 was 198,192 against 192,080 in 1912 and 172,511 in 1911, the average for the triennium being 187,594 against 158,816 for the preceding triennium.

STATEMENT E.

28. The total number of in-door and out-door patients treated at private non-aided institutions during 1913 was 2,042,812 as compared with 2,042,002 in 1912 and 1,878,151 in 1911. The average number for 1911—1913 was 1,987,655 against 1,889,542 for 1908—1910.

STATEMENT F.

29. Of the patients treated during the year (1913), 19,185 were Europeans and Eurasians, 1,481,909 were Hindus, 725,202 were Musalmans and 129,324 belonged to other classes.

30. Comparing the 3 years under review with the 3 years 1908—1910 there were on an average 17,312 Europeans and Eurasians treated against 14,643, Hindus 1,494,916 against 1,410,015, Musalmáns 670,832 against 680,253 and others 133,403 against 133,367. The fall in Musalman admissions occurs only in the Konkan (2·1 per cent.) and Gujarát (2·3 per cent.).

31. The attendance at Female Hospitals and Dispensaries has risen from 64,904 in 1911 to 70,238 in 1912 and 75,519 in 1913. The average number treated was 70,220 against 65,489 during the 3 years 1908—1910.

32. During the triennium grants have been given for erecting a maternity wing to the Lady Dufferin Hospital at Karáchi and a grant to the Lady Dufferin Hospital, Sholápur. Annual grants have also been given to the Alexandra Hospital for Women, Sukkur, and the Baker Hospital for Women, Lárkána, and an annual grant-in-aid sanctioned for the King Edward Memorial Hospital for Women under construction at Poona. During 1912-1913 Mrs. Emanuel has carried on with the aid of voluntary contributions a Travelling Dispensary for Women in the districts in which her husband has been Collector. A grant of Rs. 1,500 has recently been sanctioned in aid of this work.

STATEMENT G.

33. During the year under report 97,824 surgical operations were performed on 97,790 persons with a mortality of 0·53 per cent. The mean number of surgical operations performed during the triennium was 96,815 against 85,437 in the preceding triennium. The average number of persons operated on during the triennial period 1911—1913 was 96,737 with a mortality of 0·52 per cent. as compared with 84,960 and a mortality of 0·51 per cent. during 1908—1910.

34. The removal of Tumours and Cysts accounted for 1,529 operations with 12 deaths against 1,527 in 1912 and 1,552 in 1911 with 14 deaths in each year.

35. Amputations numbered 723 with 45 deaths as compared with 745 with 15 deaths in 1912 and 748 with 22 deaths in 1911.

36. Operations on the eye numbered 5,337, of which 1,586 were for extraction of the lens for Cataract, as compared with 1,493 in 1912 and 1,576 in 1911.

37. Vesical Calculi were removed by Litholapaxy in 1,383 cases against 1,208 in 1912 and 1,204 in 1911, the percentage of mortality for the triennial period being 2·0. Lithotomy was resorted to in 138 cases with 9 deaths against 142 with 17 deaths in 1912 and 87 with 9 deaths in 1911.

38. Abdominal operations other than those for diseases peculiar to women numbered 1,584 with 181 deaths against 1,474 with 164 deaths in 1912 and 1,387 with 162 deaths, while for diseases peculiar to women the numbers were 244 with 32 deaths as compared with 151 with 16 deaths in 1912 and 167 with 16 deaths in 1911.

39. A marked increase is shown in the number of abdominal operations other than those for diseases of women. The mean number of these has risen from 1,112 with 133 deaths in 1908—1910 to 1,484 with 169 deaths in 1911—1913, while those for diseases peculiar to women have risen from 168 with 14 deaths in the earlier period to 188 with 21 deaths in the present period.

40. Operations for radical cure of Hernia numbered 312 with 26 deaths against 221 with 15 deaths in 1912 and 243 with 21 deaths in 1911. Those for abscess of the liver numbered 148 with 43 deaths against 135 with 31 deaths in 1912 and 155 with 49 deaths in 1911. Many patients suffering from these diseases only come for treatment when *in extremis* owing to strangulated hernia and, in cases of abscess of the liver, when the organ was almost destroyed.

41. There were performed 966 obstetric operations with 48 deaths against 795 with 34 deaths in 1912 and 989 with 17 deaths in 1911. Operations for conditions peculiar to women other than obstetric and abdominal numbered 568 against 666 in 1912 and 699 in 1911.

42. No comparison can be made with the previous triennium as the nomenclature of operations in these returns was changed in 1910. Some operations being transferred from groups in which they were formerly included to others.

43. The surgical work done has been maintained at a high standard and will bear comparison with that in any group of hospitals. The better equipment of hospitals has contributed materially to the excellent results obtained and these in turn add greatly to the popularity of the hospitals.

STATEMENT H.

44. The total income, exclusive of the cash balance, amounted to Rs. 23,25,696 as compared with Rs. 22,39,196 in 1912 and Rs. 20,99,165 in 1911. The amount received from Government was Rs. 12,28,791. Rs. 2,36,789 were obtained from the Local Funds and Rs. 4,40,465 from the Municipal Funds. The interest on invested capital yielded Rs. 43,602. Subscriptions from Europeans and Indians amounted to Rs. 42,481. Miscellaneous receipts amounted to Rs. 3,33, 568, of which Rs. 91,336 were realized on account of hospital fees and Rs. 1,26,972, one-half of the up-keep of the nursing establishments of hospitals, were contributed by the several Nursing Associations, the remaining half being given by Government.

45. The total expenditure amounted to Rs. 23,20,963 as compared with Rs. 22,40,979 expended in 1912 and Rs. 21,01,095 in 1911. Deducting from this Rs. 1,77,736 remitted into the Treasury on account of hospital fees, sale proceeds of unserviceable articles, etc., and Rs. 87,416 invested during the year, the net cost was Rs. 20,55,811. The average cost of each diet was Re. 0-3-7.

46. The average annual income for the triennium under review rose from Rs. 18,80,446 to Rs. 22,21,352 of which Rs. 11,58,751 were contributed by Government and Rs. 6,69,537 by the Local and Municipal Funds. The average annual expenditure for the period was Rs. 22,21,012 against Rs. 18,70,530 for 1908—1910. The mean percentage of cost borne by Government in 1911—1913 was 48·6 against 54·3 in 1908—1910. The average cost per patient during the triennium was Re. 0-14-3 as compared with Re. 0-13-6 during the previous riennium.

STATEMENT J.

47. On 1st January 1913 the invested capital stood at Rs. 10,30,525. During the year Rs. 87,416 were invested and securities worth Rs. 44,376 were sold or withdrawn, leaving a balance of Rs. 10,73,565.

General Remarks.

48. *Medical Schools.*—The annexed table shows that at the close of the year there were 408 students attending the three Provincial Medical Schools. The Civil Medical Pupil class was abolished in 1913 and the Civil Medical Pupils were replaced at the Civil Hospitals by compounders :—

49. During the three years under review the teaching staffs of the Poona and Ahmedabad Medical Schools have been increased by the appointment of private medical practitioners. In Poona 5 medical men have been appointed, 2 as lecturers in Medicine and Surgery, an Electro-therapeutist, a Pathologist and a lady doctor as Gynæcologist. In Ahmedabad 3 medical practitioners have been appointed, 2 as tutors in Medicine and Surgery and a teacher of Bacteriology and Vaccine Therapy. In addition to their duties in connection with the Medical Schools they hold honorary appointments on the staffs of the associated hospitals, an arrangement which has been found to work satisfactorily.

50. *Equipment of Hospitals.*—A sum of Rs. 32,620 was spent on the equipment of hospitals against Rs. 1,93,987 in 1903—1910. The equipment of Civil Hospitals generally has been brought up-to-date but the allowance for renewals of bedding and clothing is not quite sufficient in many of the Civil Hospitals.

51. *Nursing Establishments.*—During the past three years Nursing Associations have been started at Surat, Násik, Ahmednagar and Jalgaon and the nursing staffs increased at St. George's Hospital, J. J. Hospital, Gokuldas Tejpal Hospital and the Ahmedabad, Dhárwár, Karáchi and Sassoon Civil Hospitals. The total number of nurses employed is 317 against 260 at the close of the last triennium. At present only 12 of the 24 mofussil Civil Hospitals are nursed but it is hoped that year by year the number nursed will increase until all the Civil Hospitals have nursing staffs. One-half the up-keep of the nursing staffs is paid by Government, the other half amounting in 1913 to Rs. 1,26,972 is contributed by the Nursing Associations from the voluntary contributions they obtain. A deep debt of gratitude is due to the ladies and gentlemen who collect the funds of the Nursing Associations and devote so much time to their management.

52. The sum of Rs. 1,15,000 has been given by Sirdár the Honourable Sir Chinubhai Madhavlal for the endowment of a training school for nurses and midwives which is to be built in connection with the Victoria Jubilee Dispensary, Ahmedabad.

53. The pay of the inferior establishment has been improved in some instances to meet the increased cost of living and additional servants have been supplied to complete establishments in a few cases.

I have the honour to be,

Sir,

Your most obedient servant,

R. W. S. LYONS, M.D.,

Surgeon-General, I. M. S.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1913.

[Total Population of the Province—27,084,317.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1912.	Number opened during the year 1913.	Number closed during the year 1913.	Number open on the last day of the year 1913.	Remarks.
1	2	3	4	5	6
I.—State—Public ...	49	(*a*) 1	...	50	(*a*) King Edward VII Memorial Hospital, Jalgaon.
II.—State—Special—					
(i) Police ...	5	...	...	5	
(ii) Forests and Surveys ...	2	...	...	2	
(iii) Canals ...	3	(*b*) 2	...	5	(*b*) Malsiras and Lake Whiting.
(iv) Others ...	14	...	...	14	
III.—Local and Municipal Funds ...	272	(*c*) 7	...	279	(*c*) Deogad and Devrukh in Ratnágiri, Medha and Shirála in Sátára, Ron in Dhárwár, Asarva in Ahmedabad and Manjhand Dispensary in Karáchi.
IV.—Private—Aided ...	15	(*d*) 1	...	16	(*d*) Leper Asylum, Belgaum.
V.—Private—Non-aided ...	309	(*e*) 28	(*g*) 14	323	(*e*) 3 in Thána, 2 in Ratnágiri, 4 in Poona, 1 in Sholápur District and 7 in Southern Marátha Country, 8 in Mahi Kántha Agency and 2 in Káthiáwár Agency and 1 in Poona Agency.
VI.—Railways ...	46	(*f*) 2	...	48	(*f*) Dhuskheda and Dhond—Bárámati construction Dispensaries on the G. I. P. Railway.
Total ...	715	41	14	742	(*g*) 1 in Bombay, 2 in Sátára, and 1 in Surat Districts and 1 each in Sátára and Sholápur Agencies, 4 in Surat Agency and Pálanpur and 3 in Rewa Kántha Agency.

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State' when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which are open to the poorer classes of the public. Class II are State dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.
